Risk Factors

Investment in the Sub-Fund is subject to risk factors. The specific risk factors highlighted below should be read in conjunction with the risk factors set out in the Offering Document.

Overall Investment Risk

All investments in securities risk the loss of capital. The investment techniques and strategies and the nature of the securities to be purchased and traded by the underlying assets may increase this risk. Many unforeseeable events may cause sharp market fluctuations, which could adversely affect the Fund and the underlying investments. Changes in economic conditions, including, for example interest rates, inflation rates, industry conditions, competition, technological developments, political events and trends, changes to tax laws and innumerable other factors, can substantially and adversely affect the

performance of the underlying assets or instruments. While the Manager will use its best efforts in the management of the Company's assets, there can be no assurance that the Company will not incur losses.

Credit Risk and Risk of Default

Credit risk and default risk refers to the loss due to a debtor's non-payment of an obligation. That is, the risk of a bond issuer defaulting on debt obligation. Companies issuing corporate and credit instruments are subject to adverse changes in their financial conditions, in general economic conditions or both which may impair the ability of such institutions to make payment on their obligations. The value of the Sub-Fund could be lost if the issuer of an instrument is unable or unwilling to meet its financial obligations. The risk is borne by investors and may cause the value of the investments in the Sub-Fund to fall.

Issuer Risk

The value of a security may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's goods or services. A high portion of the Sub-Fund may be invested in credit instruments without investment grade, which may cause higher volatility and risk to the principal amount invested in comparison to investment grade issues.

Market Fluctuations

The Sub-Fund's investments are subject to fluctuations in the asset values of the underlying assets and the risks inherent in all investments and there are no assurances that capital appreciation will occur.

Investments in other collective investment schemes

When the Sub-Fund invests in other collective investment schemes it is exposed to the risks arising out of its own investment as well as the underlying investments of such collective investment schemes. Furthermore the Fund may be subject to initial fees, exit fees, management fees and performance fees applicable to such collective investment schemes which would not have been payable had the Fund invested directly in the underlying assets of such collective investment schemes.

Bonds without investment grade and Restructuring Risk

Investment in bonds without investment grade is subject to certain risk as credit situation of the issuer may worsen during the time and the issuer may fall in to insolvency with low ability to pay out its debts. Restructuring risk refers to the risk that the value of an investment will decrease due to the restructuring of bond by issuers.

Interest rates risk

Interest rates may change during the time and negatively affect the price of the investments, primarily bonds. Generally, rise in interest rates may result in a drop of bonds prices and rise in expected yields to maturity and decline in interest rates may result in rise of bond prices and decline in yields to maturity.

Importance of the Manager

The Manager provides policy guidance and investment advice in investing the Sub-Fund's capital. The Sub-Fund's success depends, to a large extent, upon the Manager's ability to recommend appropriate investments. In addition, if any of the officers of the Investment Manager cease to participate in the operation of the Manager to the extent they relate to the operations of the Sub-Fund for any reason, the operations, objectives and activities of the Fund may be adversely affected.

Forward exchange contracts

Forward exchange contract is an agreement to purchase or sell a set amount of a foreign currency at a specified price for settlement at a predetermined time in the future. Forward exchange contract rates

are based on interest differentials between the countries concerned and are not predictions of what the rates of exchange will be in the future.

Use of leverage

The Sub-Fund shall not be leveraged or geared in any manner through the use of FDIs but can be leveraged by means of direct borrowing as per the conditions laid out in Appendix 4. Although the use of leverage may enhance returns and diversification, it may also increase the risk of loss of capital.

Repurchase agreements

In the event of a bankruptcy or other default of a transferor of securities in a repurchase agreement, the underlying fund as transferee could experience both delays in liquidating the underlying securities and losses, including: (a) a possible decline in the value of the collateral during the period while it seeks to enforce its rights thereto; (b) possible subnormal levels of income and lack of access to income during this period; and (c) expenses of enforcing its rights. In the case of default by the transferee of securities in a repurchase agreement, the underlying fund as transferor runs the risk that the transferee may not deliver the securities when required.

Risk of failure of counterparty

The Sub-Fund is subject to the risk of failure or default of any counterparty to the Sub-Fund's transactions and in particular failure or default of a broker with or through whom most if not all transactions will be undertaken. If there is a failure or default by the counterparty the Sub-Fund may not receive 100% of its contractual entitlement unless such transactions are adequately secured or collateralised.

Concentration

The Sub-Fund's investments may be subject to rapid changes in value since at times a significant percentage of the Sub-Fund's NAV may be invested in the same market sector, region or industry, or be exposed to the same underlying, subject to the Investment Restrictions referred to in this Fund Particulars Supplement.

Custody risk

Brokerage firms, banks and dealers will have custody of the underlying funds' assets and may hold such assets as nominee. Bankruptcy or fraud at one of these entities could impair the operational capabilities or the capital position of the funds.

High Yield/Sub-Investment Grade Securities Risk

Lower-rated securities will usually offer higher yields than higher-rated securities to compensate for the reduced creditworthiness and increased risk of default that these securities carry. Lower-rated securities generally tend to reflect short-term corporate and market developments to a greater extent than higher-rated securities which react primarily to fluctuations in the general level of interest rates. During an economic downturn or a sustained period of rising interest rates, highly leveraged issuers of high yield securities may experience financial stress and may not have sufficient revenues to meet their interest payment obligations. There are fewer investors in lower-rated securities, and it may be harder to buy and sell securities at an optimum time.

The Shares Lack Liquidity and Marketability

There will be no public trading market for the Investor Shares in the Sub-Fund. Consequently, investors cannot freely sell or transfer their Shares in the Sub-Fund. Investment in the Sub-Fund may therefore only be suitable for investors who are able to make a long term commitment of capital.

THE FOREGOING LIST OF RISK FACTORS DOES NOT PURPORT TO BE A COMPLETE ENUMERATION OR EXPLANATION OF THE RISKS INVOLVED IN AN INVESTMENT IN THE COMPANY. PROSPECTIVE INVESTORS SHOULD READ THIS ENTIRE OFFERING DOCUMENT

AND CONSULT THEIR OWN COUNSEL AND ADVISORS BEFORE DECIDING TO INVEST IN THE COMPANY.

Investment Objectives, Policies and Guidelines

Investment Objectives

The J&T Credit Opportunities Fund seeks to achieve long term capital appreciation of its investments by investing primarily in corporate bonds, both investment grade and non-investment grade. The average investment grade of the bonds is expected to be at the lower end of investment grade. The Sub-Fund may also invest in government bonds, repos, convertible bonds, and, regulated collective investment schemes investing in, amongst others, bonds, money market investments and third party promissory notes. These instruments and securities may be issued by or entered into with various entities in any sector and in different geographical locations, subject to the investment restrictions as described below. The appreciation of its investments is expected to exceed 5% per annum on a recommended investment horizon of at least 3 years.

Potential Investors in the Sub-Fund should also refer to the general principles applicable to each Sub-Fund of the Company which appear under the heading 'Investment Objectives, Policies and Restrictions' in the Offering Document.

The Investment Manager currently does not apply any ESG criteria for the Company or any of its Sub-Funds. As a result, the Company does not apply negative screening to exclude specific sectors or companies based on ESG criteria.

The Sub-Fund does not aim to achieve long-term capital growth integrating an ESG approach. But this situation may change depending on the regulatory and legal framework. In this case this Prospectus will be updated.

Investment Policies

The Manager will seek to achieve the investment objective of the Sub-Fund by primarily investing in the following instruments, subject to the Investment Restrictions as detailed in the next section:

- corporate bonds, both investment grade and non-investment grade. The average investment grade of the bonds is expected to be at the lower end of investment grade.

The assets of the Sub-Fund can also be invested in the following instruments, subject to the Investment Restrictions as detailed in the next section:

- Government Bonds,
- Repos for various asset classes,
- Convertible bonds,
- Promissory Notes, and
- Regulated Collective Investment Schemes investing in, amongst others, bonds, money market investments and third-party promissory notes.

Additionally, for the purposes of efficient portfolio management and hedging purposes, the Sub-Fund may enter into transactions (including without limitation, financial futures and option contracts, forward currency transactions, interest rate and currency swaps and stock lending activities), which are economically appropriate to the reduction of risk or costs (whether in income or capital terms) and to hedge currency risks.

Potential Investors in the Sub-Fund are also referred to the general principles applicable to each Sub-Fund of the Company which appear under the heading 'Investment Objectives, Policies and Restrictions' in the Offering Document.

Specific Investment Restrictions

The Manager of the Sub-Fund shall, at all times, observe the investment restrictions outlined in Appendix 4. Other than the specific restrictions outlined in Appendix 4, there shall be no restriction in the manner and extent to which the Sub-Fund may deploy, leverage, pledge or otherwise give as security, its assets, or assume liabilities, in pursuit of its specific investment strategies'.

Breaches to Investment Restrictions

The Sub-Fund and the Manager shall employ ongoing measures to ensure compliance with the Sub-Fund's investment restrictions and to ensure that such restrictions are not contravened as a direct result of any acquisition of its underlying assets. If such a contravention takes place, it would constitute a breach of the Sub-Fund's licence conditions and is required to be reported to the MFSA immediately upon becoming aware of the breach.

If one or more of the Sub-Fund's investment restrictions are at any time contravened for reasons beyond the control of the Sub-Fund or the Manager, such as market price movements or circumstances which may arise following the acquisition of the Sub-Fund's assets, the Sub-Fund or the Manager shall take such steps as are necessary to ensure a restoration of compliance with such restriction/s as soon as is reasonably practicable having regard to the interests of the Unit-holders and, in any event, within the period of six months beginning on the date of discovery of the contravention of such restriction/s.

The identification and escalation procedures in place with regards to breaches to investment restrictions is set out in the Sub-Fund's Compliance Manual.

The minimum initial lump sum investment for the Share Class C is the equivalent of USD 10 in any accepted currency and additional investments, thereafter, are subject to a minimum of USD 10 or its equivalent in any accepted currency.

Redemption of Shares

Members may at any time request through the Company, the Manager or the Authorised Distributor, to redeem their Shares in the Sub-Fund.

The redemption price per Share shall be the Net Asset Value per Share of the Sub-Fund calculated in accordance with the method established under the heading 'Dealing Prices' in the Offering Document.

Redemption instructions, in a form acceptable to the Company, may be made to the Company, the Manager or the Authorised Distributor in writing or through electronic means in the form and manner set out in the Offering Document.

A Member who wishes to redeem all or any part of his holding in the Class A, B, C, D or I Shares must give the Company, directly or indirectly through the Authorised Distributor notice of his intention until 2 PM on a relevant Dealing Cut-Off Day. If the Company, , is not given the appropriate notice, redemptions will be deferred until the next Dealing Day. Settlement of redemption proceeds will be made in accordance with the procedures set out under the heading 'Redemption of Shares' in the Offering Document.

Payment of the redemption proceeds will be made by the Company, in the currency of the relevant Sub-Fund within five (5) Business Days following the date on which such Shares are redeemed by the Company. Payment will be made by telegraphic transfer or credit in an account in the name of the registered holder or, in the case of joint holders, in the name of the first named holder. In this case of joint holders, all investors should individually satisfy the definition of Authorised Investor. The Company in its absolute discretion may extend the redemption proceeds payments having regard to, among other things, the liquidity of the Company and the potential disadvantage to other Members.

Partial sales of Shareholdings are acceptable provided the resultant value of the Shareholding remains in excess of the minimum holding of accepted currency equivalent of EUR 10 for Share Class A; CZK 300 for Share Classes B and D; USD 10 for the Share Class C; and CZK 1 000 000 for Share Class I. The Company may, on the instructions of the Directors of the Company, require a Member to redeem a Shareholding with a value of less than such minimum holding.

Transfer of shares

Members desiring to transfer their holding may follow the procedures set out under the section 'Transfer of Shares' in the Offering Document.

Switching of shares

Members desiring to switch Shares between classes may follow the procedures set out under the section 'Switching of Investor Shares' in the Offering Document.

What is FATCA?	
In an effort to curb perceived tax abuse by US persons with offshore bank accounts and/or investments, the US Congress passed the Foreign Account Tax Compliance Act ('FATCA') into law as part of a larger legislative bill – the Hire Incentives to Restore Employment Act – which was signed into US law on 18 March 2010 FATCA introduces a new regulatory compliance and reporting regime which compels certain non-US entities to identify and disclose US persons with offshore financial accounts. This stated intent is achieved by imposing a punitive 30% withholding tax on withholdable payments paid, directly or indirectly, to non-US financial institutions and certain other non-US entities that fail to comply with FATCA. Please note that in certain circumstances we may be legally obliged to share this information, and other financial information with respect to an investor's interests in the Fund with relevant tax authorities. This form is intended to request information only where such request is not prohibited by local law. For further information on FATCA please refer to the US Department of the Treasury's website at http://www.irs.gov/Businesses/Corporations/Foreign-Account-Tax-Compliance-Act-FATCA. Malta signed an Intergovernmental Agreement ('IGA') with the US on 16 December 2013 to improve international tax compliance and to implement FATCA, followed by the issuance of local implementing legislation. Although the introduction of the IGA eliminates the punitive 30% withholding tax, the Maltese government committed that all Malta Financial Institutions will comply with the identification and reporting requirements under the IGA. In terms of The Exchange of Information (United States of America) (FATCA) Order J&T Credit Opportunities Fund is required to obtain certain information from its account holders in order to ascertain their tax status for the purposes of FATCA. In order to ensure that you, as investor of J&T Credit Opportunities Fund, are compliant with FATCA and will therefore not be required to be reported to the Commissioner for Revenue as a non-compliant account holder, we kindly ask you to complete, where applicable, the relevant sections below and provide any additional information as may be required.

 - iv. is not the subject of an MFSA restriction.
3. The AIF shall not invest more than 10 per cent of its assets in securities issued by the same body.
4. The AIF shall not hold more than 10 per cent of any class of securities issued by any single issuer.
5. The AIF may, subject to the MFSA's prior approval, invest up to 100 per cent of its assets in securities issued or guaranteed by any State, its constituent States, its local authorities, or public international bodies of which one or more States are members.
6. The AIF may invest in nil-paid or partly-paid shares and subscribe for placing or underwriting as long as the amount due to be paid does not exceed 5 per cent of the value of the AIF, except that, if the amount exceeds that figure, cash not required for other purposes or for the efficient management of the portfolio shall be available to cover the full amount outstanding.
7. The AIF and its AIFM, taking into account all of the AIFs which the latter manages, shall not acquire sufficient instruments to give it the right to exercise control over 20 per cent or more of the share capital or votes of a company, or sufficient instruments to enable it to exercise significant influence over the management of the issuer.

Deposits with credit institutions

8. No more than 10 per cent of the assets of the AIF shall be kept on deposit with any one body. This limit may be increased to 30 per cent in respect of money deposited with a credit institution licensed in Malta or in any other Member State or EEA State, or with any other credit institution which has been approved by the MFSA.

Investments in other UCITS and/ or other Collective Investment Schemes

9. The AIF may acquire the Units of other Collective Investment Schemes subject to the following:
 - i. the total exposure of the AIF's assets invested in other Collective Investment Schemes must not exceed 10 per cent;
 - ii. not more than 10 per cent of the AIF's assets shall be invested in any one Scheme;
 - iii. where the AIF invests in the Units of another AIF managed by the same AIFM, the AIFM of the AIF into which the investment is made shall waive all charges which it is entitled to charge for its own account in relation to the acquisition or disposal of Units;

- iv. where a commission is received by the AIFM of the AIF by virtue of an investment in the Units of another Scheme, that commission shall be paid into the property of the AIF.

Transactions in financial derivative instruments – for efficient portfolio management purposes

- 10. The AIF may employ techniques and instruments for the purpose of efficient portfolio management. These operations may concern the use of financial derivative instruments (hereinafter referred to as “FDIs”).

The reference in this restriction to techniques and Instruments for the purpose of efficient portfolio management shall be understood as a reference to techniques and Instruments which fulfil the following criteria:

- i. they are economically appropriate in that they are realised in a cost-effective way;
 - ii. they are entered into for one or more of the following specific aims:
 - a. reduction of risk; or
 - b. reduction of cost.
- 11. The AIF shall only hold FDIs for the purposes of efficient portfolio management in terms of restriction number 10 above and shall not hold FDIs for investment purposes nor shall it be leveraged or geared in any manner through the use of FDIs.
 - 12. In order to assure it is not leveraged or geared through the use of FDIs, the AIF shall calculate its exposure relating to FDIs on the basis of the ‘commitment approach’. The AIF shall convert its derivatives positions into the equivalent positions of the underlying assets embedded in those FDIs. The commitment calculation for certain FDIs may be adjusted by a probability factor that aims to reflect the probability of the FDI’s commitment occurring. For options and warrants, the ‘delta approach’ may be used. Where it is not possible to calculate a probability factor on a scientific and objective basis, the factor is assumed to be 1. Reference should be made to Appendix VI to Part B of the Investment Services Rules for Retail Collective Investment Schemes which set out the commitment rules for a non-exhaustive list of commonly traded FDIs.
 - 13. The AIF’s maximum exposure to one counterparty in an OTC-derivative transaction shall not be more than 5 per cent of value of the assets of the AIF. This limit may be increased to 10 per cent in respect of OTC-derivative transactions made with a counterparty which is a credit institution. The exposure per counterparty of an OTC derivative should not be measured on the basis of the notional value of the OTC derivative, but on the maximum potential loss incurred by the Scheme if the counterparty defaults.
 - 14. The exposure to one counterparty in an OTC-derivative transaction may be reduced where the counterparty provides the AIF with collateral which satisfies the following criteria:
 - i. the collateral falls within one of the following categories:
 - a. cash;
 - b. government or other public securities;
 - c. certificates of deposit issued by relevant institutions; and
 - d. bonds/commercial paper issued by relevant institutions;
 - ii. collateral is:
 - a. marked to market daily;
 - b. transferred to the Custodian, or its agent; and

- c. immediately available to the AIF, without recourse to the counterparty, in the event of a default by that entity;
- iii. in the case of non-cash collateral, the collateral:
 - a. cannot be sold or pledged;
 - b. has a minimum credit rating of A or equivalent;
 - c. is held at the credit risk of the counterparty; and
 - d. is issued by an entity independent of the counterparty;
- iv. in the case of cash collateral, the collateral may not be invested other than in the following:
 - a. deposits with relevant institutions, which are capable of being withdrawn within 5 working days;
 - b. government or other public securities which have a minimum credit rating of A or equivalent;
 - c. certificates of deposit issued by relevant institutions, which have a minimum credit rating of A or equivalent; and
 - d. daily dealing qualifying money market funds which have a minimum credit rating of AAA or equivalent.

Invested cash collateral which is held at the credit risk of the AIF, other than cash collateral invested in government or other public securities or qualifying money market funds, shall be diversified so that no more than 20 per cent of the collateral is invested in the securities of, or placed on deposit with, one institution. Invested cash collateral may not be placed on deposit with, or invested in securities issued by the counterparty or a related entity.

15. The AIF may net the mark-to-market value of its OTC-derivative positions with the same counterparty, thus reducing the AIF's exposure to its counterparty, provided that the AIF has a contractual netting agreement with its counterparty which creates a single legal obligation such that, in the event of the counterparty's failure to perform owing to default, bankruptcy, liquidation or any other similar circumstance, the AIF would have a claim to receive or an obligation to pay only the net sum of the positive and negative mark-to-market values of included individual transactions.
16. Derivative transactions which are performed on an exchange where the clearing house meets the following conditions, shall be deemed to be free of counterparty risk:
 - i. is backed by an appropriate performance guarantee;
 - ii. is characterised by a daily mark-to-market valuation of the derivative positions; and
 - iii. is subject to at least daily margining.
17. The AIF shall only enter into OTC-derivatives for the purposes of efficient portfolio management with counterparties who:
 - i. are not the AIFM or Custodian of the AIF; and
 - ii. form part of a group whose head office or parent company is licensed, registered or based in Malta, any member of the Organisation for Economic Co-operation and Development (hereinafter referred to as the "OECD"), the EU or the EEA and is subject to prudential supervision; and
 - iii. have a credit rating of at least A (Standard & Poor's) or A2 (Moody's) or an equivalent rating by another internationally renowned credit rating agency.

Such counterparty shall satisfy the AIFM or the AIF that it has:

- agreed to value the transaction at least weekly; and
- will close out the transaction at the request of the AIFM or the AIF at fair value.

18. When the AIF holds a FDI which automatically or at the AIF's or counterparty's discretion, requires cash or physical settlement on maturity or exercise, the AIF shall hold the underlying Instrument as cover. The level of cover should be calculated on the basis of the commitment approach as indicated in restriction number 12 above.

19. When in view of the nature of the FDI, the AIF cannot hold the underlying as cover (e.g. in the case of index-based FDIs), restriction number 18 above shall not apply and the AIF shall hold any of the following assets as cover:

- i. cash;
- ii. liquid debt instruments (e.g. government bonds of first credit rating) prudently adjusted by appropriate haircuts (minimum of 5 per cent);
- iii. other highly liquid assets which are correlated with the underlying of the FDIs, prudently adjusted by appropriate haircuts (minimum 5 per cent).

The level of cover should be calculated on the basis of the commitment approach as indicated in restriction number 12 above.

For the purposes of the above, the instruments held as cover should be considered as 'liquid' when they can be converted into cash at no more than 7 business days at a price closely corresponding to the current valuation of the Financial Instrument. It has to be ensured that the respective cash amount is at the AIF's disposal at the maturity/ expiry or exercise date of the FDI.

Uncovered Sales

20. The AIF may not carry out uncovered sales of securities or other Financial Instruments. 'Uncovered sales' are all transactions in which the AIF is exposed to the risk of having to buy securities at a higher price than the price at which the securities are delivered, thus making a loss, and the risk of not being able to deliver the underlying for settlement at the time of the maturity of the transaction.

General Restrictions – Single Issuer Exposures

21. Notwithstanding the individual limits laid down in restrictions numbers 3, 8 and 13, the AIF may not combine:

- i. investments in securities issued by;
- ii. deposits made with; and/or
- iii. counterparty exposures arising from OTC-derivative transactions undertaken with; a single body in excess of 35 per cent of its assets.

Borrowing Limits

22. The AIF may borrow up to a maximum of 10 per cent of:

- i. its assets, when the AIF is set up as an investment company or limited partnership; or
- ii. the value of the AIF, when the AIF is set up as a unit trust or common contractual fund.

Provided that the borrowing is on a temporary basis and such that the AIF's overall risk exposure does not exceed 110 per cent of its assets under any circumstances.

Provided further that the AIF may acquire foreign currency by means of a 'back to back' loan. Foreign currency obtained in this manner is not classed as borrowings for the purposes of this restriction provided that the offsetting deposit:

- i. is denominated in the base currency of the AIF; and
- ii. equals or exceeds the value of the foreign currency loan outstanding.

Miscellaneous

23. A Sub-Fund of an AIF may invest in units of one (1) or more sub-funds within the same AIF provided that:

- i. adequate disclosure of the intentions of the Sub-Fund to invest in other Sub-Fund of the AIF is made in the Constitutional Documents and/or the Offering Documentation;
- ii. the AIF must have stipulated, in its Constitutional Documentation, that the assets and liabilities of each Sub-Fund are treated as a patrimony separate from the assets and liabilities of any other Sub-Fund of same AIF in terms of regulation 9 of the Companies Act (Investment Companies with Variable Share Capital) Regulations;
- iii. where the AIF is sold exclusively to Retail Investors the Sub-Fund is allowed to invest up to 10% of its assets into any Sub-Fund within the same AIF;
- iv. the target Sub-Fund(s) may not themselves invest in the Sub-Fund which has invested in the target Sub-Fund(s);
- v. in order to avoid duplication of fees, where the Manager of the Sub-Fund and the Manager of the target Sub-Fund is the same or, in the case of different Managers, where one Manager is an affiliate of the other, only one set of management, subscription and/or redemption fees shall apply between the Sub-Fund and the target Sub-Fund;

Provided that the restriction in point (v) shall apply only in respect of and to the extent (up to the portion) of the investment of the Sub-Fund in the target Sub-Fund;

- vi. for the purposes of ensuring compliance with any applicable capital requirements and for the purpose of calculating the net asset value of each Sub-Fund, cross sub-fund investments will be counted once;
- vii. any voting rights acquired by the Sub-Fund from the acquisition of the units in the target Sub-Fund shall be disappplied;
- viii. clear disclosure of cross sub-fund investments shall be made in the AIF's Yearly and Annual Audited Financial Statements;

For the purpose of point (viii) the Administrator of the target Sub-Fund shall have adequate system capability to comply with these disclosure requirements as well as other reporting requirements in accordance with industry standards; and
- ix. a Conflict of Interest Policy shall be in place and accordingly any conflicts of interest that arise shall be duly recorded, mitigated and disclosed as may be necessary.
