Investment Objective, Policy and Restrictions

Investment Objective

The Sub-Fund seeks to generate long-term capital growth on a CZK and EUR base through investments in a wide range of transferable securities and money market instruments in order to achieve an optimum return from capital invested, while reducing investment risk through diversification.

The Sub-Fund will primarily invest in equity securities in Central and Eastern Europe (CEE), Western Europe and USA.

There can be no assurance that the Company's investment strategy will achieve profitable results. As a result of investment risks, an investor may lose all of the capital it has invested in the Company.

The Sub-Fund falls under Article 6 in terms of the SFDR and as defined in terms of the Offering Memorandum.

Investment Policy

In selecting investments for the Sub-Fund, the Investment Manager shall have regard to interest, dividend and capital returns of such investments. The aim of this approach is to focus on preserving investors' funds and increasing those funds through conservative investments.

The Sub-Fund's assets will be invested primarily in listed equity securities (including but not limited to Exchange Traded Funds ("ETFs")), and to a lesser extent in debt securities and Money Market Instruments. The target allocation of the Company's portfolio to the different type of investments will be as follows:

- Equity securities – minimum 50% (up to a maximum of 100%)
- Debt securities – minimum 0% (up to a maximum of 50%)
- Money market instruments – 0% (up to a maximum of 50%)

Equity securities shall include UCITS compliant stocks; ETFs: indicating the index, commodity, bonds or index fund that will be tracked through these securities and other UCITS funds: providing details to the composition of the investments contained therein such as market orientation: e.g. EU/ Swiss, focus: Principally, investment in equity securities will entail the direct purchase of equity securities in CEE, Western Europe and USA from companies distributing dividend yield on a regular basis and from various market sectors, employing a fundamental approach.

Investment in debt securities shall be carried out directly by investing in listed government and corporate bonds, and indirectly by purchasing units in UCITS funds investing in debt securities. The portfolio of securities held by such UCITS funds shall include: low/high yield securities and zero coupon/convertible securities mainly from US/EU/Swiss markets. Principally, investment in debt securities (purchased directly, or indirectly through investment in UCITS funds) shall consist of short and medium term liquid debt securities with maturity not exceeding 5 years, issued by companies in CEE, Western Europe and USA. The Sub-Fund doesn't intend to target any particular rate structure and/or credit rating.

The Sub-Fund shall not gain exposure to unlisted securities, neither shall it and invest in Collective Investment Schemes with whom the Scheme's founder shareholders, directors and Investment Manager are directly or indirectly involved.

Money market instruments shall include debt securities with maturity up to 1 year, short term fixed or open bank deposits as well as cash and cash equivalents.

Should the Sub-Fund invest a substantial proportion of its assets in other UCITS funds, the maximum level of management fees that may be charged by each UCITS fund to the Company, will not exceed 2% of the target funds' net asset value.

The Sub-Fund aims to be invested in equity securities at a minimum of 50 % all the time and it is expected the Sub-Fund will be close to be fully invested but there may be periods when a significant portion of the assets, but to a maximum of 50%, of the Company is in cash or cash equivalent investments due to periods of stress on the market, or before funds received from investors are invested by the Investment Manager, or for any other reason.

The Sub-Fund shall not enter into securities financing transactions, total return swaps, repurchase and reverse repurchase agreements and securities lending transactions.

The Investment Manager may attempt to time the market from time to time, but it is expected that under normal market conditions, it intends to keep the Sub-Fund essentially fully invested in the above-mentioned asset classes. However, the Company may, as a temporary defensive strategy, i.e. in view of protecting Shareholders' interests, also purchase other types of securities (within the limits set out in Appendix A of this Offering Supplement) only if, in the judgment of the Investment Manager, investments in the Company's usual markets or types of securities become decidedly unattractive because of current or anticipated adverse economic, financial, political and social factors.

The Sub-Fund may invest in cash or cash equivalent instruments on an ancillary basis or for cash management purposes, pending investment in accordance with this investment policy and to meet operating expenses and redemption requests. For temporary or defensive purposes and when market conditions warrant such an approach, the Sub-Fund may make substantial temporary defensive investments in cash or cash equivalent instruments, which may affect the Sub-Fund's ability to pursue its investment objective.

The Sub-Fund's global exposure is calculated taking into account:

- a) the incremental exposure and leverage generated by the Sub-Fund through the use of financial derivative instruments including embedded derivatives pursuant to the fourth sub-paragraph of Article 51(3) of Directive 2009/65/EC, which may not exceed 100% of the net asset value of the Sub-Fund; or
- b) the market risk of the sub-fund's portfolio.

In this respect, and given that the Sub-Fund shall not make use of FDIs, the calculation of the global exposure shall be based on the market risk of the Sub-Fund's portfolio, as detailed in Article 41 of the Commission Directive 2010/43/EU.

In order to calculate the global exposure of the Sub-Fund, based on market risks, the Scheme shall make use of the commitment approach.

Investors are reminded that they should read this Offering Supplement in its entirety and should consider the risks further described under the heading 'Risk Factors'.

Investment Restrictions

In pursuing its Investment Objective and Investment Policy, the Sub-Fund will be subject to the Investment Restrictions set out in the Section of the Offering Memorandum entitled "**Investment Objectives, Policies and Restrictions**" as well as those outlined above and in Appendix A.

The directors of the Company have issued, notwithstanding the provisions of Appendix A, a binding provision according to which the fund may invest no more than 10% of the value of its assets in UCITS and/or other funds.

Leverage

Without prejudice to additional borrowing provisions contained under Appendix A, the Company may borrow up to ten (10) percent of its Net Asset Value on a temporary basis for liquidity purposes.

It should, however, be noted that the issuers of securities or other instruments in which the Sub-Fund may invest, may utilise leverage or gearing.

 - e) shares or units of UCITS authorized according to the UCITS Directive and/or other funds within the meaning of Article 1(2)(a) and (b) of the UCITS Directive, should they be situated in a EU Member State or not, provided that:
 - i. up to one hundred (100) percent in aggregate of the Company's net assets be invested in UCITS and/or other funds as long as the target UCITS do not invest more than ten (10) percent of their net assets in other UCITS/funds;
 - ii. such other funds are authorized under laws which provide that they are subject to supervision considered by the MFSA to be equivalent to that laid down in EU law, and that cooperation between authorities is sufficiently ensured;
 - iii. the level of protection for unitholders in such other fund is equivalent to that provided for unitholders in a UCITS, and in particular that the rules on asset segregation, borrowing, lending, and uncovered sales of transferable securities and money market instruments are equivalent to the requirements of the UCITS Directive;

 - f) deposits with credit institutions which are repayable on demand or have the right to be withdrawn, and maturing in no more than twelve (12) months, provided that the credit institution has its registered office in a EU Member State or, if the registered office of the credit institution is situated in a non EU Member State, provided that it is subject to prudential rules considered by the MFSA as equivalent to those laid down in EU law;
 - g) financial derivative instruments, including equivalent cash-settled instruments, dealt in on a regulated market referred to in paragraphs (a), (b) and (c); and/or OTC derivatives, provided that:
 - i. the underlying consists of instruments covered by paragraphs (a) to (h), financial indices, interest rates, foreign exchange rates or currencies, in which the Company may invest according to its investment objectives;
 - ii. the counterparties to OTC derivative transactions are institutions subject to prudential supervision, and belonging to the categories approved by the MFSA; and

- iii. the OTC derivatives are subject to reliable and verifiable valuation on a daily basis inasmuch as such day is a Business Day and can be sold, liquidated or closed by an offsetting transaction at any time at their fair market value at the Company's initiative;
 - h) money market instruments other than those dealt in on a regulated market and referred to in paragraphs (a) to (d) above, if the issuer or issuer of such instruments is itself regulated for the purpose of protecting investors and savings, and provided that they are:
 - i. issued or guaranteed by a central, regional or local authority, a central bank of a EU Member State, the European Central Bank, the European Union or the European Investment Bank, a non-EU Member State or, in the case of a Federal State, by one of the members making up the federation, or by a public international body to which one or more EU Member States belong; or
 - ii. issued by an undertaking any securities of which are dealt in on regulated markets referred to in paragraphs (a), (b) or (c); or
 - iii. issued or guaranteed by an establishment subject to prudential supervision, in accordance with criteria defined by EU law or by an establishment which is subject to and complies with prudential rules considered by the MFSA to be at least as stringent as those laid down by EU law; or

- 2) However, the Company:
- a) may invest up to ten (10) percent of its net assets in transferable securities and money market instruments other than those referred to in paragraph 1) above;
 - b) may acquire movable and immovable property which is essential for the direct pursuit of its business;
 - c) may not acquire either precious metals or certificates representing them; and
 - d) may hold ancillary liquid assets.

Risk diversification

- 1) In accordance with the principle of risk diversification, the Company will invest no more than five (5) percent of its net assets in transferable securities or money market instruments issued by the same entity. The Company may not invest more than twenty (20) percent of its net assets in deposits made with the same entity.
- 2) The risk exposure to a counterparty of the Company in an OTC derivative transaction may not exceed ten (10) percent of its net assets when the counterparty is a credit institution referred to in paragraph 1(f) above, or five (5) percent of its net assets in any other case.
- 3) Moreover, the total value of the transferable securities and money market instruments held by the Company in the issuing bodies in each of which it invests more than five (5) percent up to a maximum of (10) percent of its net assets must not exceed forty (40) percent of the value of its net assets. This limitation does not apply to deposits and OTC derivative transactions made with financial institutions subject to prudential supervision.
- 4) Notwithstanding the limits laid down in paragraphs 1) and 2) above, the Company may not combine, when this would lead it to invest more than twenty (20) percent of its net assets in a single entity, any of the following elements:
 - a) investments in transferable securities or money market instruments issued by said entity;
 - b) deposits made with said entity;

- c) exposures arising from OTC derivatives transactions undertaken with said entity.
- 5) The following exceptions can be made:
- a) The aforementioned limit of ten (10) percent can be raised to a maximum of twenty-five (25) percent for certain debt securities if they are issued by credit institution whose registered office is situated in an EU Member State and which is subject, by virtue of law, to particular public supervision for the purpose of protecting the holders of such debt securities. In particular, the amounts resulting from the issue of such debt securities must be invested, pursuant to the law in assets which sufficiently cover, during the whole period of validity of such debt securities, the liabilities arising there from and which are assigned to the preferential repayment of capital and accrued interest in the case of default by the issuer. If the Company invests more than five (5) percent of its net assets in such debt securities as referred to above and issued by the same issuer, the total value of such investments may not exceed eighty (80) percent of the value of the Company's net assets.
 - b) The aforementioned limit of ten (10) percent can be raised to a maximum of thirty-five (35) percent for transferable securities or money market instruments issued or guaranteed by an EU Member State, by its local authorities, by a non EU Member State or by public international bodies of which one or more EU Member States are members.
 - c) The transferable securities and money market instruments referred to in this paragraph 5) are not included in the calculation of the limit of forty (40) percent laid down in paragraph 3) above.
 - d) The limits stated under paragraphs 1) to 5)(b) above, may not be combined and, accordingly, investments in transferable securities or money market instruments issued by the same entity or in deposits or derivatives instruments made with this entity in accordance with paragraphs 1) to 5)(b) above, may not, in any event, exceed a total of thirty-five (35) percent of the Company's net assets.
 - e) The Company may invest in aggregate up to twenty (20) percent of its net assets in transferable securities and money market instruments with the same group.
 - f) Companies which are included in the same group for the purposes of consolidated accounts, as defined in accordance with Directive 83/349/EEC or in accordance with recognized international accounting rules, are regarded as a single entity for the purpose of calculating the limits contained in paragraphs 1) to 5)(e) above.
 - g) Without prejudice to the limits laid down in paragraphs 10 to 12 below, the limits of five (5) and ten (10) percent laid down above are raised to a maximum of twenty (20) percent for investment in equity and or debt securities issued by the same entity when the aim of the investment policy of the Company is to replicate the composition of a certain equity or debt securities index which is recognized by the MFSA, on the following basis:
 - the composition of the index is sufficiently diversified,
 - the index represents an adequate benchmark for the market to which it refers,
 - it is published in an appropriate manner.

This twenty (20) percent limit is raised to thirty-five (35) percent where that proves to be justified by exceptional market conditions in particular in regulated markets where certain transferable securities or money market instruments are highly dominant. The investment up to this limit is only permitted for a single issuer.
- 6) When a transferable security or money market instrument embeds a derivative, the latter must be taken into account when complying with the requirements of the abovementioned restrictions.
- 7) The Company may further invest up to one hundred (100) percent of its net assets, in accordance with the principle of risk spreading, in transferable securities and money market instruments issued or guaranteed by a EU Member State, its local authorities, a non-EU Member State member of the Organization for Economic Co-Operation and Development or public international bodies of which one or more EU Member State are members, provided that in such event the Company must hold securities from at least six (6) different issues, but securities from any one issue may not account for more than thirty (30) percent of the total amount.
- 8) The Company has six (6) months from its date of authorization to achieve compliance with Articles 52 to 55 of the UCITS Directive.

- a) The Company may acquire shares or units of UCITS, provided that no more than twenty (20) percent of its net assets are invested in a single UCITS.
 - b) For the purposes of applying this investment limit, each sub-fund of a UCITS with multiple sub-funds, shall be considered as a separate entity, provided that the principle of segregation of commitments of the different sub-funds is ensured in relation to third parties.
 - c) Investments made in shares or units of other funds other than UCITS may not exceed, in aggregate, thirty (30) percent of the net assets of the Company.
 - d) When the Company has acquired shares or units of UCITS and/or other funds, the assets of the respective UCITS or other funds do not have to be combined in the view of the limits laid down in paragraphs 1) to 5)(f) above.
 - e) When the Company invests in the shares or units of other UCITS and/or other funds that are managed, directly or by delegation, by the same management company or by any other company to which the management company is linked by common management or control or by a substantial direct or indirect holding, that management company or other company may not charge any management fee nor any subscription or redemption fees on account of the UCITS' investment in the units of other UCITS and/or other funds.
- 10) The Company will not acquire any shares carrying voting rights which would enable it to exercise significant influence over the management of an issuing entity.
- 11) The Company may not acquire more than:
- a) ten (10) percent of non-voting shares of the same issuer;
 - b) ten (10) percent of the debt securities issued by the same issuer;
 - c) twenty-five (25) percent of the units of the same UCITS and/or other fund; or
 - d) ten (10) percent of the money market instruments of the same issuer.
- The limits laid down in the b), c) and d) may be disregarded at the time of acquisition if at that time the gross amount of debt securities or money market instruments, or the net amount of the securities in issue, cannot be calculated.
- 12) The limits of paragraphs 10) and 11) above are waived as to:
- a) transferable securities and money market instruments issued or guaranteed by an EU Member State or its local authorities;
 - b) transferable securities and money market instruments issued or guaranteed by a non-EU Member State;
 - c) transferable securities and money market instruments issued by public international bodies of which one or more EU Member States are members;
 - d) shares held in the capital of a company incorporated in a non-EU Member State and investing its assets mainly in securities of issuers having their registered office in that Member State, if under the legislation of that Member State such a holding represents the only way in which the Company can invest in the securities of the issuers of that Member State. This derogation only applies if the company has an investment policy complying with paragraphs 1) to 5)(f) under "Risk diversification" as well as paragraph 9) within the same section. If these limits are exceeded, the provisions laid down in Article 57 of the UCITS Directive shall apply mutatis mutandis;
 - e) shares held by the Company in the capital of one or more subsidiary companies carrying on only the business of management, advice or marketing in the country/state where the subsidiary is located, in regard to the repurchase of units at Shareholders' request exclusively on its or their behalf.
- 13) The Company may not borrow more than ten (10) percent of its total net assets, and then only from financial institutions and on a temporary basis. The Company may, however, acquire foreign currency by means of a back to back loan. The Company will not purchase securities while borrowings are outstanding in relation to it, except to fulfill prior commitments and/or exercise subscription rights. However, the Company can borrow up to ten (10) percent of its net assets to make possible the acquisition of immovable property essential for the direct pursuit of its business. In this case, these borrowings and those referred to above (temporary

borrowings) may not in any case in total exceed fifteen (15) percent of the Company's net assets.

- 14) The Company may not grant credits or act as guarantor for third parties. This limitation does not prevent the Company to purchase securities that are not fully paid up as further described thereunder. This limitation does not apply to margin payments on option deals and other similar transactions made in conformity with established market practices.
- 15) The Company will not purchase any securities on margin (except that the Company may obtain such short-term credit as may be necessary for the clearance of purchases and sales of securities) or make short sales of securities or maintain a short position. Deposits on other accounts in connection with option, forward or financial futures contracts, are, however, permitted within the limits provided for here below.

The Board of Directors is authorized to introduce further investment restrictions at any time in the interests of the Shareholders provided these are necessary to ensure compliance with the laws and regulations of those countries in which the Company's shares are offered and sold. In this event this Offering Memorandum will be updated.

- 16) If any of the above limitations are exceeded for reasons beyond the control of the Company or as a result of the exercise of subscription rights attaching to transferable securities or money market instruments, the Company must adopt, as a priority objective, sales transactions for the remedying of that situation, taking due account of the interests of its Shareholders.
- 17) The Company via the Management Company employs a risk-management process which enables it to monitor and measure at any time the risk of the positions and their contribution to the overall risk profile of the portfolios of the Company. The Management Company employs a process allowing for accurate and independent assessment of the value of the OTC derivatives.

Information relating to the quantitative limits that apply in the risk management of the Company to the methods chosen to this end and to the recent evolution of the main instrument categories' risks and yields may be provided to investors upon request.

APPENDIX B – NET ASSET VALUE

The Net Asset Value per Share of each Class will be expressed in the Dealing Currency of such Class. In respect of Classes, the Dealing Currency of which differs from the Reference Currency, the Net Asset Value of such other currency denominated Classes will be calculated using the then applicable currency exchange rate (Reference Currency / Dealing Currency).

The Classes are valued weekly and the Net Asset Value per Share is dated as of each Valuation Day. If after the calculation of the Net Asset Value, there has been a material change in the quotations on the markets on which a substantial portion of the investments attributable to the Sub-Fund are dealt or quoted, the Company may, in order to safeguard the interests of Shareholders and the Company, cancel the first valuation and carry out a second valuation, for all the Classes concerned, prudently and in good faith.

The Net Asset Value per Share of each Class on any Valuation Day is determined by dividing the value of the total assets of the Company properly allocable to the Class of Shares less the liabilities of the Company properly allocable to such Class by the total number of Shares of such Class outstanding on such Valuation Day.

The Subscription Price and the Redemption Price of the different Classes will differ within the Sub-fund as a result of the differing fee structure, Dealing Currency and/or distribution policy for each Class.

In determining the Net Asset Value per Share, income and expenditure are treated as accruing weekly.

The valuation of the Net Asset Value per Share shall be made in the following manner:

The assets of the Company shall be deemed to include:

- i. All cash on hand or on deposit, including any interest accrued thereon;
- ii. All bills and demand notes payable and accounts receivable (including proceeds of securities sold but not delivered);
- iii. All bonds, time notes, certificates of deposit, Shares, stock, debentures, debenture stocks, subscription rights, warrants, options and other securities, financial instruments and similar assets owned or contracted for by the Company (provided that the Company may make adjustments in a manner not inconsistent with paragraph (a) below with regards to fluctuations in the market value of securities caused by trading ex-dividends, ex-rights, or by similar practices);
- iv. All stock dividends, cash dividends and cash distributions receivable by the Company to the extent information thereon is reasonably available to the Company;
- v. All interest accrued on any interest bearing assets owned by the Company except to the extent that the same is included or reflected in the principal amount of such asset;
- vi. The preliminary expenses of the Company, including the cost of issuing and distributing Shares of the Company, insofar as the same have not been written off;
- vii. The liquidating value of all forward contracts and all call or put options the Company has an open position in;
- viii. All other assets of any kind and nature including expenses paid in advance.

The value of such assets shall be determined as follows:

- a) The value of any cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends, interest declared or accrued and not yet received, all of which are deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof is arrived at after making such discount as may be considered appropriate in such case to reflect the true value thereof;

- b) Securities listed on a recognized stock exchange or dealt on any other regulated market will be valued at their latest available closing price or mid-price, or, in the event that there should be several such markets, on the basis of their latest available prices on the main market for the relevant security;
- c) in the case of any Investment which is quoted, listed or normally dealt in, on or under the rules of a regulated market but in respect of which, for any reason:
 - (i) prices on that regulated market may not be available at any relevant time; or
 - (ii) in the opinion of the Board of Directors, the latest available price does not truly reflect the fair market value of the relevant securities; or
 - (iii) the value thereof based on the said prices or quotations as described in paragraphs (i) and (ii) above does not establish, in the opinion of the Directors, the fair value of any Investment, then the value thereof shall be determined by such professional person as may be appointed by the Directors for such purpose or generally in relation to some or all the Investments of the Company and for such time as may be determined by the Directors. Such professional person must fit the criteria of an independent valuer as defined below;
 - The valuer will be independent from the Scheme, its officials, or any service providers to the Scheme
 - The valuer must be of good standing with recognized and relevant qualifications and an authorised member of a recognised professional body in the jurisdiction of the assets
 - The valuer must be appointed by the Directors, in consultation with the Auditors
- d) Securities not listed or traded on a stock exchange or not dealt on another regulated market will be valued on the basis of the probable sales proceeds determined (as described in Appendix C – Valuation in the Offering Memorandum.)
- e) Interest rate swaps will be valued at their market value established by reference to the applicable interest rates curve. Index and financial instruments related swaps will be valued at their market value established by reference to the applicable index or financial instrument.

Any assets held in the Company not expressed in the Reference Currency will be translated into such Reference Currency at the last rate published on Bloomberg on the relevant Valuation Day.

The liabilities of the Company shall be deemed to include:

- i. All loans, bills and accounts payable;
- ii. All accrued interest on loans of the Company (including accrued fees for commitment for such loans);
- iii. All accrued or payable expenses (including for the avoidance of doubt the Aggregate Fee, i.e. the Management Fee and the Operating and Administrative Fee, and any other third party fees). In determining the amount of such liabilities, the Company shall take into account all expenses payable and all costs incurred by the Company, which shall comprise the Aggregate Fees, the fees payable to the Directors (including all reasonable out-of-pocket expenses), investment advisors (if any), investment managers, accountants, Custodian, Sub-Custodian, Management Company, Fund Central Administration, Registrar and Transfer agent, permanent representatives in places of registration, the Distributors, if any, trustees, fiduciaries, correspondent banks and any other agent employed by the Company, fees for legal and auditing services, costs of any proposed listings and of maintaining such listings, promotion, printing, reporting and publishing expenses (including reasonable marketing and advertising expenses and costs of preparing, translating and printing in different languages) of offering memorandum, addenda, explanatory memoranda, registration statements, annual reports and semi-annual reports, all taxes levied on the assets and the income of the Company, registration fees and other expenses payable to governmental and supervisory

authorities in any relevant jurisdictions, insurance costs, costs of extraordinary measures carried out in the interests of Shareholders (in particular, but not limited to, arranging expert opinions and dealing with legal proceedings) and all other operating expenses, including the cost of buying and selling assets, customary transaction fees and charges charged by Custodian banks or their agents (including free payments and receipts and any reasonable out-of-pocket expenses, i.e. stamp taxes, registration costs, scrip fees, special transportation costs, etc.), customary brokerage fees and commissions charged by banks and brokers for securities transactions and similar transactions, interest and postage, telephone, facsimile and telex charges. The Company may calculate administrative and other expenses of a regular or recurring nature on an estimated figure for yearly or other periods in advance, and may accrue the same in equal proportions over any such period;

- iv. All known liabilities, present and future, including all matured contractual obligations for payment of money or property, including the amount of any unpaid dividends declared by the Company;
- v. An appropriate provision for future taxes based on capital and income to the relevant Valuation Day, as determined from time to time by the Board of Directors, and other reserves, if any, authorized and approved by the Board of Directors; and
- vi. All other liabilities of the Company of whatsoever kind and nature except liabilities represented by Shares of the Company.

Temporary Suspension of Determination of Net Asset Value per Share and issue or redemption of Shares

The Board of Directors may suspend the determination of the Net Asset Value per Share and the issue or redemption of Shares in any Class in the following circumstances:

- a) During any period when any of the principal stock exchanges or other markets on which a substantial portion of the investments of the Company from time to time is quoted or dealt in is closed otherwise than for ordinary holidays, or during which dealings therein are restricted or suspended, provided that such restriction or suspension affects the valuation of the investments of the Company quoted thereon;
- b) During the existence of any state of affairs which constitutes an emergency in the opinion of the Company as a result of which disposal or valuation of assets owned by the Company attributable would be impracticable;
- c) During any breakdown in the means of communication or computation normally employed in determining the price or value of any of the investments or the current price or value on any stock exchange or other market in respect of the assets;
- d) During any period when the Company is unable to repatriate funds for the purpose of making payments on the redemption of Shares or during which any transfer of funds involved in the realization or acquisition of investments or payments due on redemption of Shares cannot, in the opinion of the Board of Directors, be effected at normal rates of exchange;
- e) Upon the publication of a notice convening a general meeting of Shareholders for the purpose of winding-up the Company; or
- f) In all other cases as provided for in the UCITS Directive.

Any request for subscription or redemption shall be irrevocable except in the event of a suspension of the determination of the Net Asset Value per Share.

Notice of the beginning and of the end of any period of suspension will be published in a medium selected by the Board of Directors, as well as in the official publications specified for the respective countries in which Company Shares are sold. The Maltese regulatory authority, and the relevant authorities of any Member States of the European Union in which Shares of the Company are marketed, will be informed of any such suspension. Notice will likewise be given to any subscriber or Shareholder, as the case may be, applying for subscription or redemption of Shares.

Publication of Net Asset Value per Share

The Net Asset Value per Share of each Class is made public at the registered office of the Company and Authorised Distributors. The Company may arrange for the publication of this information in leading financial newspapers in the Reference Currency and/or in the Dealing Currency of the Class concerned, as the case may be, and in any other currency at the discretion of the Board of Directors.
